

Dr Daniel Williamson is Senior Lecturer in Molecular Paediatric Oncology at the Wolfson Children's Cancer Centre within the Newcastle University Centre for Cancer. Having trained at The Institute of Cancer Research (London) and completed a Marie-Curie Fellowship at Institut Curie, he currently leads a research team with major interests in understanding the biological basis of embryonal brain tumours and sarcomas (principally Malignant Rhabdoid Tumours, Medulloblastoma and Rhabdomyosarcoma) aimed at translating these findings into improved clinical treatments. He plays leading roles in national (CCLG) and International research networks (SIOP-Europe) and clinical trials in ATRT and his research is supported by programme grants from Cancer Research UK, The Brain Tumour Charity/Children with Cancer UK/Great Ormond Street Children's Charity, LoveOliver and Children's Cancer North.
